**EndlessOne Global Inc.**, is an international, tier-one payment card issuer, payment/transaction processor and banking software company. Through our licensing and relationships with money networks, sponsoring banks and corporations, we design, create and issue custom-tailored, full service, plastic white-label payment card services and programs at the buy rate fees. We own, operate and manage processing servers with international money transfer networks. EndlessOne Global is the leader in prepaid card and debit card technology innovation with our award winning, patented security features and proprietary software for payment processing. EndlessOne moves money all around the world, in any currency, faster and safer than any other financial institution.

**Payment Cards:** We create, design, issue and support a wide variety of custom card programs to meet the needs of a wide range of business goals and strategies, including but not limited to: debit cards, general spend cards, prepaid cards, prepaid business cards, loyalty/rewards cards, gift cards, benefit/discount cards, incentive cards, payout cards, credit cards, ID/government cards and corporate/payroll rewards cards and any type of card you can imagine.

Our Proprietary portal gives cardholders access to a full suite of electronic money management tools and an associated eGlobalBank account where they have access to a wide variety of features including, to name a few:

- Lock/unlock cards.
- Request a single-use CVV number for each transaction.
- Load/unload cards and complete transfers in real time.
- Manage transactions on prepaid and virtual accounts anytime, anywhere.
- Move funds seamlessly between personal, family, or other accounts.
- Use a distinctive SMS technology for card-to-card transfers.
- Activate cards, check balances, view account history, set alerts.
- Take advantage of program security features and fully branded services and more

All of our cards allow an individual to have a virtual checking account and a routing number which solves banking issues for the millions of un-bankable and under-banked globally, and much more.

#### **eGlobalBank Software:**

- Uses highly advanced software technology with multi-currency functionality and processing.
- Manages all bank accounts, debit cards, credit cards, gift cards, rewards, points, crypto-currency and more, worldwide, for an unlimited number of accounts.
